Trans. of Akademiya Nauk SSSR. Doklady, 1963,
v. 148, no. 1, p. 54-56.

DESCRIPTORS: *Acceleration, Theory, Equations of
motion, Analytic geometry.

A treatment of the systematic use of the methods for
tangential geometry in investigations, concerning: en-
velopes of certain straight lines, connected with units
of mechanisms in the plane-parallel motion; envelopes
of certain planes, connected with units of mechanisms
in a complicated spatial motion; and, dual problems,
i. e. ruled surfaces, formed by certain straight lines,
connected with units of mechanisms in a complicated
spatial motion.
